Model DSP-Ex

Intrinsically Safe Portable Dewpoint Hygrometer Ranges available between -110°C to +20°C (-166°F to +68°F) Td

The **Model DSP-Ex** is a fully self-contained portable hygrometer from Alpha Moisture Systems which will deliver the most dependable moisture measurement in industrial and laboratory applications. Designed with the operator in mind, **Model DSP-Ex** is extremely easy to use and the digital **dewSMART™** technology ensures accurate and reliable readings over long periods with little or no maintenance. The incorporation of stainless steel quick connect fittings, together with the Desiccant Dry-down Chamber, allows rapid measurements which saves both time and cost.

Fully Portable - Rugged - Fast Response -

Stable - Reliable - Accurate - Easy to set up.

Features

- Intrinsically Safe ATEX Ex ia IIC T3 / T4 Ga
- Overall Range -110°C to +20°C Dewpoint
- User Friendly Simple Operation
- Portable Fully Self Contained
- Self-Diagnostics on Start-up
- Digital Indication
- Automatic Switch Off

• Quick Connect SS Coupling

% • •

- "C" Type Disposable Batteries
- Excess of 250 Hours of Continuous Operation

bhamoisture

Comes with Anti-Static Carry Bag as standard.

Desiccant Dry-Down Chamber For Rapid
Measurements

CE

 Selectable Engineering Units in °C, °F, ppb(v), ppm(v), ppm(w), g/m³ & lb/MMSCF

The **Model DSP-Ex** is certified intrinsically safe to Ex ia IIC T3/T4 Ga for use in hazardous areas without the need for any additional accessories. Designed to operate at atmospheric pressure, **Model DSP-Ex** is available in a total of 8 different ranges, encompassing an overall range from -110°C to +20°C dewpoint, with the display selectable in various engineering units:- °C, °F dewpoint, ppm(v), ppb(v), ppm(w), g/m³ and Ib/MMSCF. Parts per million (weight) can be programmed for gases other than those pre-programmed (Air, Ar, H₂, SF₆, CO₂ & N₂) by simply inputting the molecular weight of the gas under test.

Full interchangeability of the **dewSMART™** Model DDHS Sensor ensures guaranteed accuracy and reliability without the need to return the whole unit back to base for calibration and setup.

Model DSP-Ex is supplied ready for use with batteries installed, certificate of calibration traceable to National and International Humidity standards, two metres of stainless steel braided PTFE sample hose, instruction manual and an anti-static carrying case as standard.

Specifications

SENSOR TYPE

Model DDHS Aluminium Oxide Ultra High Capacitance Digital Sensor

INTRINSIC SAFETY CERTIFICATION Code : Ex ia IIC T4 Ga (Ta = -20°C to +37°C) Ex ia IIC T3 Ga (Ta = -20°C to +50°C) Certificate No.: Sira 02ATEX2132X

RANGE

Six different ranges encompassing an overall range of -110° C to $+20^{\circ}$ C dewpoint (-148 to $+68^{\circ}$ F).

Corresponding ranges in ppm(v), ppb(v), ppm(w), g/m³ & lb/MMSCF. Parts per million (weight) programmable for different gases.

DISPLAY

Industrial specification, 2 \times 20 Character LCD with programmable bright & dark contrast.

DISPLAY RESOLUTION 0.1°C dewpoint / 0.1ppm

POWER SUPPLY

9V DC - Six "C" type disposable batteries.

BATTERY LIFE

In excess of 250 hours during continuous operation. **ELECTRONICS ACCURACY** Better than ± 1% of range. WARM UP TIME

15 Seconds

SENSOR CALIBRATION ACCURACY

Better than $\pm 2^{\circ}$ C dewpoint. All units supplied with certificates documenting factory calibration against known moisture levels traceable to National & International humidity Standards.

Alpha Moisture Systems Model DSP-Ex

REPEATABILITY

± 0.1°C dewpoint. TYPICAL RESPONSE TIME

95% of reading within 20 seconds in normal operation.

OPERATING CONDITIONS

Temperature : -20°C to +50°C Humidity : 0-98% RH, Non-condensing Storage Temperature : -50°C to +70°C Opertaing Pressure : Atmospheric to 0.5 barg ELECTRMAGNETIC COMPATIBILITY (EMC)

Complies BS EN 61326-1 FLOW RATE TO SENSOR

2 to 20 litres/minute

CONNECTIONS

Swagelok quick-connect stainless steel coupling and 0.25" overall diameter compression tube fitting.

WARRANTY

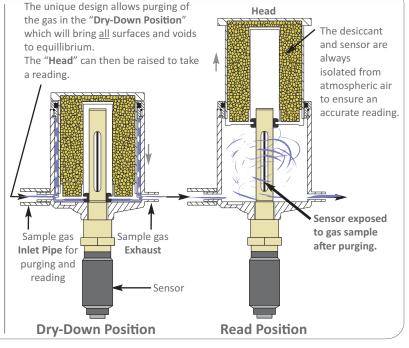

1 year from date of delivery against faulty material or workmanship.

Desiccant Dry Down Technology

The Desiccant Head Assembly

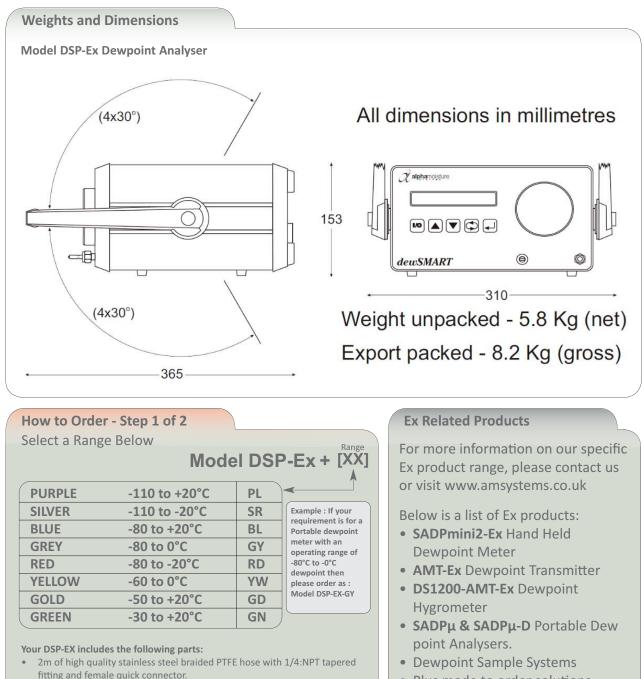

Keeping the sensor dry between tests ensures that the DSP-Ex is always ready to carry out rapid spot checks. The unique design of the Desiccant Head achieves this by surrounding the sensor with desiccant before the head is lifted for sampling.

At no time is the sensor allowed to come into contact with ambient air. The chamber is also designed so that the void space and chamber wall surfaces are purged with sample gas, before exposure of the sensor, so giving faster, more accurate and reliable results.

Corrosive Gases

The Sensor should not be exposed to corrosive gases (or corrosive contaminants in the gas sample) as these can chemically attack the sensor, impairing calibration accuracy and/or damaging it beyond economic repair. Examples of such gases are mercury (Hg), ammonia (NH₃), chlorine (Cl₂) etc. Strong oxidising agents such as ozone (O₃) should also be prevented from coming into contact with the sensor.

fitting and female quick con
