Re: pDR-1000 Discontinuation Notice

Dear Customer,

We wish to notify you of the discontinuation of the Thermo Scientific pDR-1000 product offering, effective March 30, 2022.

We are constantly evaluating our existing product portfolio to ensure that we can continue to service our products and support the needs of our customers in the best possible manner. The pDR-1000 instrument has encountered the obsolescence of several key electronic components over the past couple of years that are no longer available on the market.

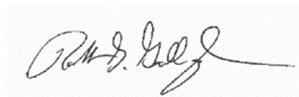

**Last Dates Accepting:**

- **Instrument Orders – [March 30, 2022]**
- **Consumables, Spare Part and Service Support Availability\* – [March 30, 2025]**

We apologize for any inconvenience this may cause. Although there is no direct replacement available for the pDR-1000, a number of applications can be successfully transitioned over to the Thermo Scientific pDR-1500. Thermo Fisher stands behind its Industrial Hygiene products and we remain committed to providing our customers with superior products to meet your monitoring needs. I am pleased to let you know that we are currently evaluating new technologies and product designs for our next generation gas and dust monitoring applications and will communicate any updates to our portfolio offerings as they become available.

Should you have any questions and or comments on the above information or Thermo Scientific products in general, please feel free to contact me.

Sincerely,

Bob Gallagher  
Thermo Fisher Scientific  
Product Line Manager  
Environmental and Process Monitoring
